UNIVERSITIES IN UKRAINE

SUBJECT: *Letter to Ukrainian universities - the possibility of studying and working at the Faculty of Organization and Informatics in Croatia*

Dear Ms/Mr,

In the midst of the war in your country, we are aware of the seriousness of the situation and the catastrophic consequences you and your families are faced with. We are aware of the problems faced by the entire academic community in Ukraine, especially by scientists, teachers and students who have been prevented from working normally.

As international scientific community (within **#ScienceForUkraine** movement) has started collecting information about universities, scientific institutions and other organizations within the system that can be of help to Ukrainian students and researchers, we decided as the Faculty of Organization and Informatics (FOI), member of University of Zagreb, offer you help and support in further work, as well as the study process for all students.

We are the **Faculty of Organization and Informatics** (University of Zagreb), located in four cities in northwestern Croatia - Varaždin, Sisak, Zabok and Križevci and we are focused on conducting study programs and research and development projects in the field of informatics, economics and business.

Following these unfortunate events, for which we cannot predict how long they will last and what their outcome will be, we are free to contact you and to offer assistance in all segments of continuing the work of all stakeholders in the higher education process, where you need it. We make available to students of your university the opportunity to attend our courses and workshops in English, and cooperation within our teaching and research activities for your staff. That includes:

1. Free continuation of education in Croatian or English;
2. Possibility of completing part of the studies at our faculty (student exchange program);
3. Performing professional practice within the organizational units of the faculty;
4. Involvement in teaching and research projects;
5. Psychological counseling.

Information on our project activities and research groups can be found [here](#), a brochure for international students [here](#), and a list of English language courses and workshops [here](#).

We invite all Ukrainian students and teachers who want to continue their studies / work at the Faculty of Organization and Informatics, University of Zagreb, to contact us at international@foi.unizg.hr.

Find more information on social networks with the hashtag **#FoiForUkraine**.

Kind regards,

A handwritten signature in blue ink that reads 'Igor Balaban'.

Assoc. Igor Balaban, Ph.D.

Vice Dean for Science, Projects and International Cooperation

Faculty of Organization and Informatics

University of Zagreb
